

## Workshop Title: "EcoQuest Adventure"

### Introduction:

Welcome to the "EcoQuest Adventure" – where we're turning you into champions of the planet. Get ready for a day full of excitement, creativity and a touch of magic as we dive into the world of eco-entrepreneurship!

### Activity 1: "Planet Saver Superheroes":

- Start the day by forming teams and creating your own eco-hero personas.
- Design a superhero cape or mask using recycled materials.
- Each team introduces their eco-hero and shares the special powers they have to save the planet.

### Activity 2: "Trash to Treasure Challenge":

- Time to unleash your creativity! Use recycled materials to build something awesome.
- It could be a robot, a piece of art or a gadget that helps solve an environmental problem.
- Teams present their creations, explaining how they transform trash into treasure.

### Lunch Break

### Activity 3: "Eco-Entrepreneurial Lemonade Stand":

- Learn the basics of entrepreneurship by creating your own eco-friendly lemonade stand.
- Brainstorm ways to make it eco-conscious – reusable cups, biodegradable straws, or even a rainwater collection system.
- Sell your eco-lemonade to other participants and staff.

### Activity 4: "Greenovation Showcase":

- Prepare a short skit or presentation showcasing your superhero personas, trash-to-treasure creations and the eco-friendly lemonade stand.
- Performances are followed by a friendly competition with prizes for the most creative, eco-friendly and entertaining presentations.

### Closing Ceremony:

- Award certificates to all participants for their eco-entrepreneurial efforts.

### Key Takeaways:

- ✍ **Teamwork:** Discover the power of working together to create positive change.
- ✍ **Creativity:** Unleash your imagination to turn ordinary things into extraordinary solutions.
- ✍ **Eco-Entrepreneurship:** Learn that entrepreneurship isn't just about making money, it's about making a difference.

Workshop	
EcoQuest Adventure	
Planet Saver Superheroes (2 hours)	
9:00 - 9:30	Registration and Welcome

Greenovation Showcase (2 hours)	
16:00 - 18:00	Preparation & Presentations
18:00 - 18:30	Awarding Certificates, Acknowledging Efforts and Closing Remarks Group Photo and Farewell

**Needed materials for interactive session:**

1) **SUPERHERO CAPE OR MASK**

- **Old T-Shirts or Bed Sheets:**  
old colorful t-shirts or bed sheets. These can serve as the base material for your capes.
- **Cardboard:**  
cardboard from old boxes. This can be used to add structure to the cape or as a base for your superhero mask.
- **Scissors:**  
A pair of scissors is essential for cutting and shaping your recycled materials into superhero-worthy accessories.
- **Fabric Glue or Needle and Thread:**  
Depending on your preference and materials, use fabric glue for a no-sew option or a needle and thread for a more traditional approach.
- **Markers or Fabric Paint:**  
Add some flair to your capes and masks with colorful markers or fabric paint. Unleash your creativity and design your superhero symbols.
- **Old Buttons, Beads or Sequins:**  
Dig through your old craft supplies or jewelry box to find buttons, beads, or sequins that can be repurposed to decorate your superhero gear.
- **Elastic Bands or String:**  
Use elastic bands or strings to secure the cape around your shoulders or to fasten the mask. This ensures a comfortable fit for your superhero ensemble.
- **Recycled Plastic Lids or Bottle Caps:**  
Get inventive and use recycled plastic lids or bottle caps as embellishments for your cape or mask. They can represent special powers or just add a cool texture.
- **Old Magazines or Newspapers:**

- Cut out pictures or words from old magazines or newspapers to create a collage on your superhero gear. This adds a personalized touch.

## 2) ECO-FRIENDLY LEMONADE

- **Reusable Cups and Biodegradable Straws:**  
colorful reusable cups. Throw in some fun biodegradable straws to make sipping the lemonade even more enjoyable.
- **Eco-friendly Lemonade Mix:**  
Choose a lemonade mix that uses natural ingredients and avoids excessive packaging. Better yet, consider making your own lemonade with fresh lemons!
- **Organic Lemons:**  
Use fresh, organic lemons.
- **Rainwater Collection System:**  
If possible, set up a simple rainwater collection system to use in your lemonade. It's a cool way to highlight water conservation.
- **Upcycled Decorations:**  
Get creative with decorations using upcycled materials. Old banners, cardboard signs or repurposed items can add charm to your stand without contributing to waste.
- **Eco-friendly Ice Packs:**  
Keep your lemonade cool with reusable ice packs. Opt for packs that can be refrozen, reducing the need for disposable alternatives.
- **Waste Separation Bins:**  
Set up clearly labeled bins for recycling and composting. This encourages responsible waste disposal during and after the event.
- **Natural Sweeteners:**  
Consider using natural sweeteners like honey or agave syrup instead of processed sugars. This not only adds a unique twist to your lemonade but also aligns with your eco-friendly theme.
